

Our blue sleeve is actually **Green.**

Going green is simple. It means keeping our environment healthy by doing our part to eliminate waste. All too often, being ecologically responsible comes with a hefty price tag. As a

printer, you can be green and improve your bottom line as well. Twinlock self-adhesive sleeves do not require mounting

tape which greatly reduces landfill waste and material costs. Our sleeves are reusable, as the adhesion remains year after year. Twinlock sleeves are also easy to use, saving precious time and money. The concept makes perfect sense, which makes our blue sleeves "green".
