Clear Lam Packaging Exceeds 1000 Twinlock® Print Sleeves in Elk Grove
Village IL Print Facility

Elk Grove Village, IL – February 3, 2010– Clear Lam Packaging, a Printer/Extruder/Converter located in Elk Grove Village, IL has nearly completed a full conversion to Twinlock® print sleeves, moving away from sticky-back mounting tape. Twinlock sleeves have led to a reduction of bounce on press, allowing for faster press speeds while improving print quality. Recently Clear Lam and OEC Graphics visited Polymount International in Holland to receive the 1000th sleeve from Jan Willem Boers, Owner and Twinlock developer.

With over 100,000 environmentally sustainable sleeves in operation world-wide, Twinlock sleeves eliminate the need for sticky-back mounting tape and reduce operational costs by increasing pressroom efficiencies. Printers may expect up to a 25% or greater increase in press speeds and up to a 40% increase in mounting efficiencies. OEC Graphics, Inc. is the sole North American distributor of Twinlock, working together with Polymount's new manufacturing facility in Newnan, GA.
